CLAIMS

What is claimed is:

1. A system for generating viewership profiles to facilitate distributing promotions based on the profiles of at least one network device, comprising:

a promotion agent associated with the network device for collecting viewership activity data of the network device; and

a life-cycle manager server which receives the viewership activity data from the promotion agent and correlates the viewership activity data with program schedules to generate the viewership profiles.

- 2. The system of claim 1, wherein the viewership activity data of the network device includes a program channel on the network device.
 - 3. The system of claim 1, wherein the viewership activity data includes a time at which the network device was tuned to the channel.
- 4. The system of claim 1, wherein the viewership activity includes a time at which the network device was tuned away from the channel.
 - 5. The system of claim 1, wherein the viewership activity data is collected if the difference between a time the network device was tuned to the channel and a time the network device was tuned away from the channel is greater than a time period set by the user.

- 6. The system of claim 1, wherein the viewership activity data is collected by the promotion agent over a twenty-four hour period before the viewership activity data is received by the life-cycle manager.
- 7. The system of claim 1, wherein the viewership activity data includes a program viewed by a viewer.
 - 8. The system of claim 7, wherein the viewership activity data provides a percentage of time the program was viewed by the viewer.
 - 9. The system of claim 8, wherein the percentage of time is precise to within about one percent.
- 10. The system of claim 7, wherein the program belongs to a genre.
 - 11. The system of claim 10, wherein the viewership activity data provides a percentage of time which the genre is viewed.
 - 12. The system of claim 11, wherein the percentage of time is precise to within about one percent.
- 15 13. The system of claim 7, wherein the program belongs to multiple genres.
 - 14. The system of claim 1, wherein the viewership profile data is matched with a group profile.
 - 15. The system of claim 14, wherein the group profile is based on viewer attributes.

- 16. The system of claim 15, wherein the attributes include a geographic location.
- 17. The system of claim 15, wherein the attributes include demographic characteristics.
- 18. The system of claim 15, wherein the attributes include a genre of programs.
- The system of claim 1, wherein short-term viewership activity is compared with the viewership profile.
 - 20. The system of claim 19, wherein the short-term viewership activity spans over a time period of about one minute.
 - 21. The system of claim 19, wherein the short-term viewership activity spans over a time period of about one hour.
 - 22. The system of claim 1, wherein the viewership profile includes viewership activity data spanning a time period of about four weeks.
 - 23. The system of claim 1, wherein the viewership profile includes viewership activity data spanning a time period of about eight weeks.
- The system of claim 1, wherein the viewership profile includes viewership activity data spanning a time period of about twelve weeks.
 - 25. The system of claim 1, wherein the viewership profile includes viewership activity data spanning a time period defined by a user of the system.

- A method for generating viewership profiles to facilitate distributing promotions based on the profiles to at least one network device, comprising the steps of: collecting viewership activity data for the network device; correlating the viewership activity with program schedules; and generating viewership profiles for the network device based on the correlation.
- 27. The method of claim 26, wherein the step of collecting viewership activity data further includes collecting channels selected on the network device.
- 28. The method of claim 26, wherein the step of collecting viewership activity data further includes collecting a time at which the network device was tuned to the channel.
- 29. The method of claim 26, wherein the step of collecting viewership activity data further includes collecting a time at which the network device was tuned away from the channel.
- The method of claim 26, wherein the step of collecting viewership activity data collects viewership activity data if the difference between a time the network device was tuned to the channel and a time the network device was tuned away from the channel is greater than a time period set by the user.
- The method of claim 26, wherein the step of collecting viewership activity data is performed over a twenty-four hour period.
 - 32. The method of claim 26, wherein the step of collecting viewership activity data includes collecting a program viewed by a viewer.

- 33. The method of claim 26, further comprising the step of matching the viewership profile of each network device with a group profile.
- 34. The method of claim 33, wherein the step of matching includes matching to the group profile based on viewer attributes.
- 5 35. The method of claim 34, wherein the step of matching includes matching to viewer attributes based on a geographic location.
 - 36. The method of claim 34, wherein the step of matching includes matching to viewer attributes based on demographic characteristics.
 - 37. The method of clam 34, wherein the step of matching includes matching to viewer attributes based on a genre of programs.
 - 38. The method of claim 26, further comprising the step of comparing the viewership profile with short-term viewership activity.
 - 39. The method of claim 38, wherein the step of comparing includes comparing with short-term activity spanning over a time period of about one minute.
- The method of claim 38, wherein the step of comparing includes comparing with short-term activity spanning over a time period of about one hour.
 - 41. The method of claim 26, wherein the step of generating the viewership profile is based on viewership activity spanning a time period of about four weeks.
 - 42. The method of claim 26, wherein the step of generating the viewership profile is based on viewership activity spanning a time period of about eight weeks.

- 43. The method of claim 26, wherein the step of generating the viewership profile is based on viewership activity spanning a time period of about twelve weeks.
- 44. The method of claim 26, wherein the step of generating the viewership profile is based on viewership activity spanning a time period defined by a user of the system.
